

January “Nutrition Tip of the Month”

If your pet is experiencing dry, flaky winter skin/coat, try improving the quality of the diet by adding in Essential Fatty Acid Supplements.

We recommend “Animal Essential” brand Fatty Acid Supplements, which are tasty, effective and easy to give. The entire capsule can be added to the food, or for finicky eaters, just open capsule and pour contents over meal.

Read label instructions for proper dosing.

Grizzly Salmon Oil is also a great product and can be special ordered through Creature Comforts.
