

# November

## “Nutrition Tip of the Month”

**Brrr...It is getting cold outside! This time of year, pets start to suffer from the symptoms of arthritis. Supplementing your pet’s diet with glucosamine can help with the pain.**

---

We recommend Naturvet glucosamine products. If you are looking to prevent arthritis symptoms, choose the purple bottle. If your pet is already showing symptoms, choose the green bottle. If your pet is geriatric, choose the white/gold bottle.

Glucosamine is a nutritional supplement which helps to add cushion to the joint. It can take several weeks for this cushion to build up. Please use the product for 6-8 weeks before deciding if it is helping your pet.

Discontinue the use of glucosamine two weeks prior to any surgery.

**For more information on this, please ask. We are happy to help answer any questions you may have.**
